GROWERS OF
SMALL FRUIT PLANTS
FOR SPRING PLANTING

Middle Ridge Road
PERRY, LAKE COUNTY, OHIO

All our plants are state certified as free from injurious diseases. We have been growing them for over 20 years. They are carefully separated to keep the varieties true. We begin digging in the spring as soon as the frost leaves the ground and continue usually until the 20th of May. All new varieties are thoroughly tested before releasing them to our customers.

The following are our descriptions of the varieties of plants we offer for sale.

M—Midseason

E—Early

L—Late

PREMIER (M)

Smooth evenly conical form, large, its color the glossy red which sells on sight. Quality unsurpassed, production greatest of all early berries. Plants are vigorous, healthy and strongly reproductive.

DORSETT (M)

Fruiting season early with profitable continuance. Its bright flame red color and unusual firmness makes it a good market berry. This variety has a fine flavor and is beautifully shaped.

CATSKILL (M)

Extra large, this berry has the most dazzling red color. It is a good variety for all types of soil. Fine texture and firm in quality. An all-round market berry.

BLAKEMORE (E)

Originated and recommended by the U. S. Department of Agriculture. Berries bluntly conical, good market size; rarely white tipped with solid center, small seeds, firm flesh, tough skin. Excellent flavor, aromatic, with high pectin content. The color is glossy bright red, developing quite evenly on both upper and lower sides, only slightly changed by holding or canning. Prefers the heavier types of soil.

HEBRON

HEBURN (L)

Very late variety. Fruit is a bright glossy red, flavor is delicious. It is a strong yielder, heavy stems bear fruit high off the ground. By ripening late it puts it past late spring frosts.

HERE ARE THE REST OF OUR STRAWBERRY
VARIETIES FOR YOU TO CHOOSE FROM.

CATO- Cato is offered as a high quality

variety for home use. This is the
sweetest berry on the market and equal

to Marshall in quality and much super-
ior as a plant maker. The skin bruises

easily and it will therefore not be a

satisfactory market berry unless hand-

led very carefully, The fruits are

large, glossy, and ripen in midseason.

SENATOR DUNLAP- This variety is consid-

ered one of the best plant producers.

The fruit is good sized, beautiful

bright red, glossy, and firm. It is a

splendid keeper, good freezer.

Do you freeze fruits? Write for my

personal hints on freezing strawberries,

asparagus and rhubarb.

Johnnie Cox

FAIRFAX- a new kind similar in many ways to Dorsett, but with enough differences to warrant growing both. It produces a heavy crop of berries, better than average size, deeply conical in shape, more brilliant red than Dorsett and of firmer texture; season about the same. The flavor is sweetly luscious; freezes well.

CLERMONT- this is a most excellent variety for both home and market. The fruits are large, and hold up well in size throughout the season. The berries are regular, very glossy and attractive, do not bruise easily and are excellent in quality. The plants are somewhat susceptible to leafspot.

DRESDEN- plants are vigorous, healthy, increase rapidly and bear large crops. Berries are very large, glossy, medium red and attractive. The season is early.

Send for my booklet on freezing rhubarb and strawberries.

Johnnie Cox

EVERBEARING STRAWBERRIES

STREAMLINER

The newest of everbearers, Streamliner has a berry that is practically round, extremely bright red in color, very sweet. This new berry should be tried out in a small way.

MINNESOTA 1166

This variety of everbearing will become the most popular. The fruit is attached to a long stem that has a bright green calyx. The berries are immense in size. The color of the fruit is dark red and it is extremely fine flavored. Try Minnesota 1166.

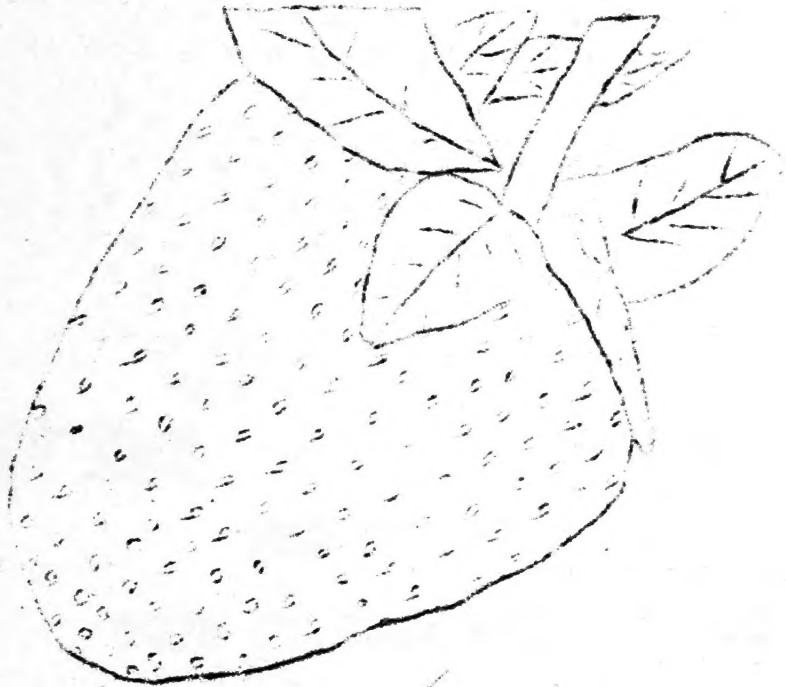

SCARLET GEM

Berries may be picked soon after the normal spring plants and carry on thru the summer and late fall. The variety is a good plant maker, berries are uniformly large and keep well. It is an excellent berry for shortcakes in the fall.

Stevenson & Cox offers no guarantee as to productiveness of the plants listed for sale. We ship fresh, live plants, true to name and in good condition.

We cannot be responsible for the length of time it takes to reach you or delays in planting. Any complaint must be made within one week after receiving plants.

TEMPLE strawberries are recommended by our Ohio State Experimental Station as one of the most resistant to Red Stele disease. If your plants have been wilting during the fruiting season you should try Temple. The fruit is similar to Premier. The crop is large.

TEMPLE

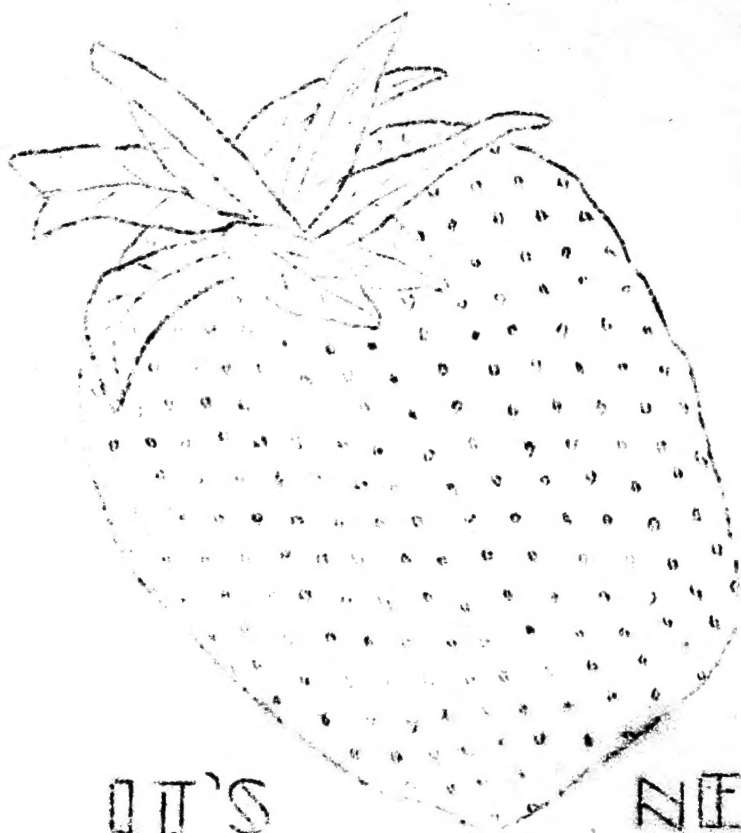

Note our low prices!

25 for \$.84	50 for \$1.15
